Committee

Old Chinese Proverb says...

**“Tell me
and I'll forget.
Show me, and I
may remember.
Involve me, and
I'll understand”**

What is curriculum mapping?

- Curriculum mapping is the documentation and explanation of what we teach.
- It is a multi-year on going and collaborative process that help us understand teaching and learning throughout specify planning.

How will this benefit the students?

- A curriculum without gaps and overlaps
- Improved alignment between student outcomes and the curriculum
- Increased student achievement and performance

How will this help teachers?

It is a communication tool

- among teachers and staff on teams
- among teachers and staff across teams
- acquaints new personnel with curriculum

How will this benefit school?

It is a planning tool

- for curriculum and assessment enhancement
- for achieving student outcomes
- for ordering materials
- for developing syllabi
- for designing professional development

Essential Questions

- Focus a broad topic of study
- Have multiple answers and perspectives.
- They address “why” or “how”.
- They are “mental Velcro” that helps ideas stick in students’ minds.
- Example: Which is more important – water or air?

Content

- Content is the essential concepts and topics covered during a month.
- Content is written beginning with a noun
- Examples:
 - Cultural diversity
 - Water cycle
